OperaLucis

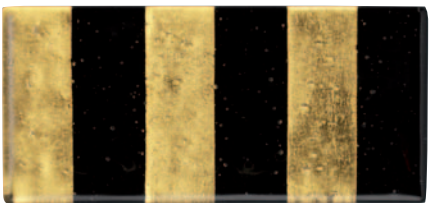

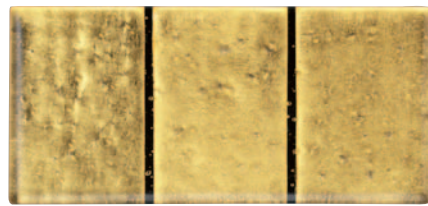

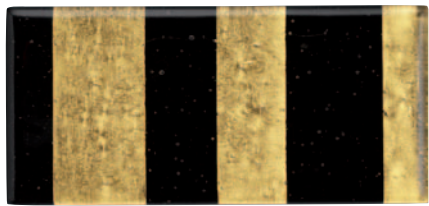

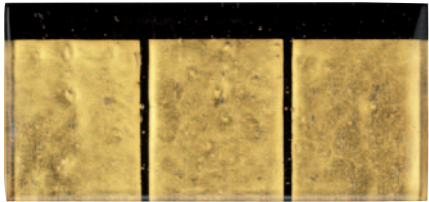

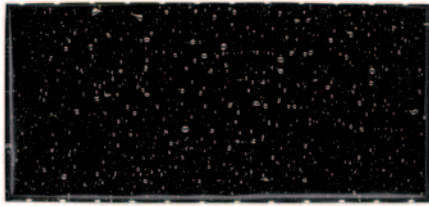

OperaLucis is formed of tiles in Murano glass and 24 karat gold leaves. These exclusive and precious materials and the craftsmanship of every single piece give a unique artistic value to the finished product. OperaLucis integrates the technology of LED lights which splendidly highlight the characteristic impact of Murano glass and the luminosity of the gold leaf.

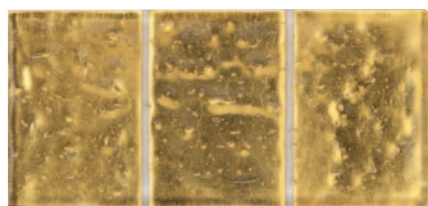

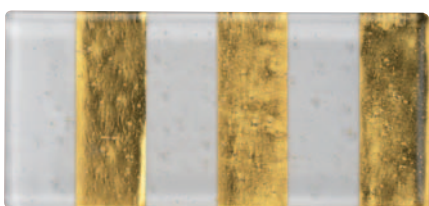

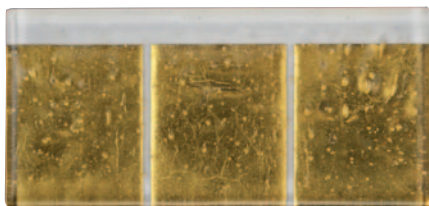

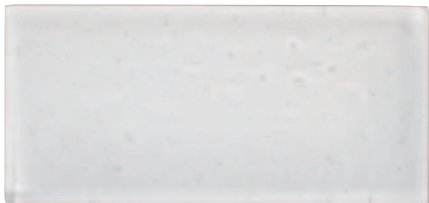

The glass specific processing, together with the led light, creates a spectacular visual and tactile effect: the light appears through Murano glass material, characterized by little air bubbles included in the glass. This is the way glass mass and shape are perceived, in both the depth and the surface lightly corrugated of smooth glass.

In this way the glass, an artificial material, acquires the same features of a regular natural material, variegated and discontinuous, homogeneous and changeable. Each element turns out to be unique and rich of particulars to find out. Possible alterations in light intensity reveal or hide the material, turning the work in a fascinating sight.

Materials:

Muran glass | 24 carat gold
Led lamps | Black | White

Modularity:

10 | 20 10 | 10 15 | 15 15 | 30 cm
on request trims | non-standard form

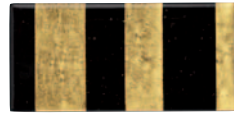

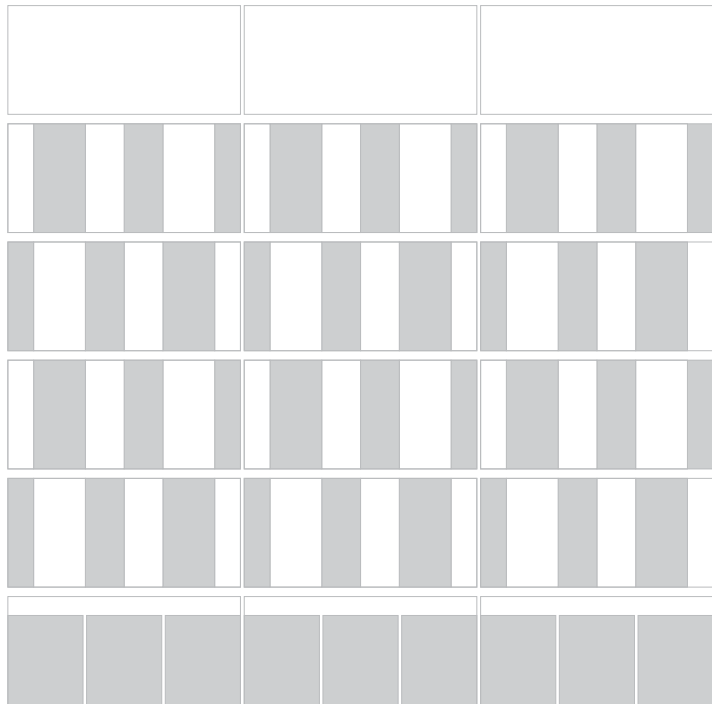

Thickness: 12 mm / 3 mm surface coplanar

Weight: 33 kg/mq

Led lights:

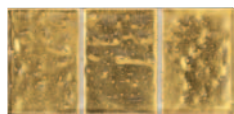

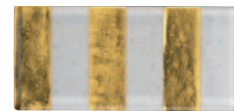

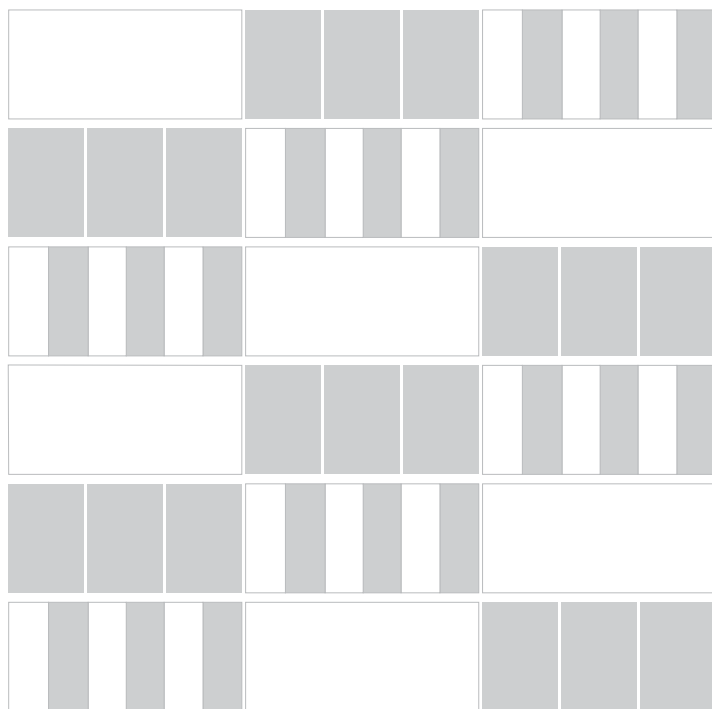

Strip-plot led | Low supply voltage
Brightness adjustment

Patented technology
Registered design

OperaLucis

The Opere Venistile production possesses a material valence that can be touched and details of the materials used and workmanship can be admired on close observation. The specific style and the simple but refined geometry of the design permit a vast range of creations on the surface of the tiles and make the product perfectly adaptable to a specific situation, favoring the formal requirements of the overall project. The scenic effect of the installation permits Opere Venistile to be inserted in high level, exclusive interiors with formal solutions of outstanding richness and efficiency in space usage.

OperaLucis and OperaAuris are Venistile creations entirely Made in Italy.

OperaLucis

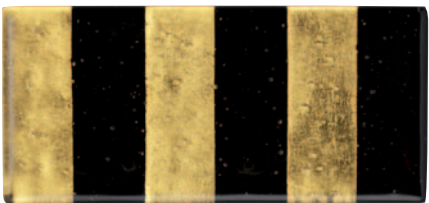

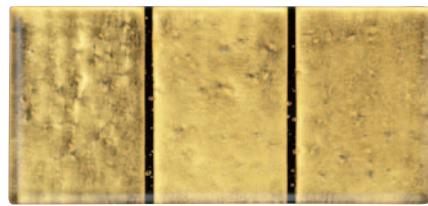

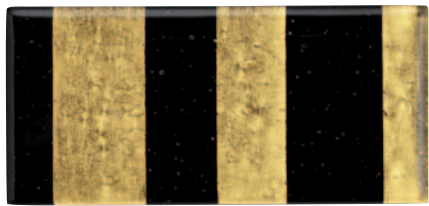

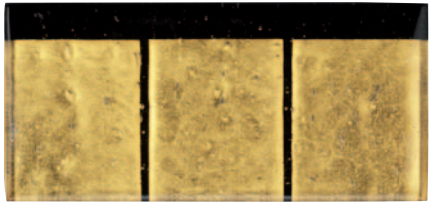

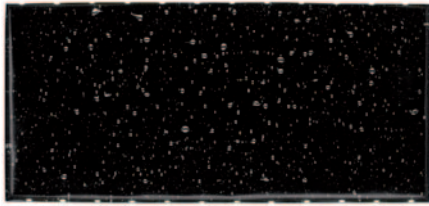

OperaLucis è costituita da formelle in vetro di Murano e oro a 24 carati in foglia. La preziosità è data dai materiali esclusivi e dalla lavorazione artigianale di ogni pezzo che conferisce un valore unico e artistico alla realizzazione compiuta. OperaLucis integra la tecnologia della luce a led che permette di evidenziare splendidamente l'effetto caratteristico del vetro di Murano e la luminosità dell'oro.

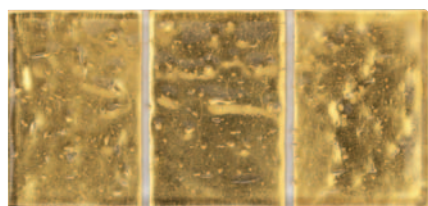

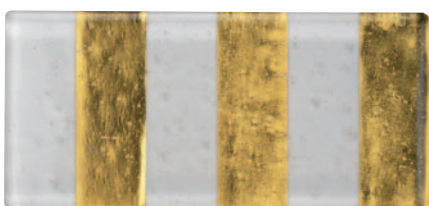

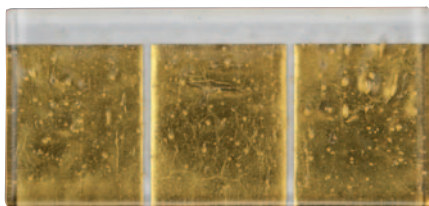

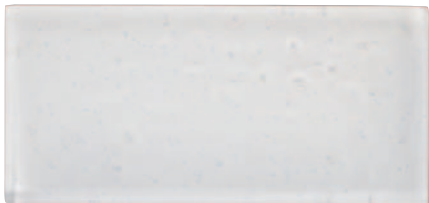

La lavorazione specifica del vetro e l'abbinamento della luce a led producono un effetto visivo e tattile spettacolare: la luce si manifesta attraverso la materia stessa del vetro di Murano, caratterizzato dall'inclusione di gocce d'aria nella pasta vetrosa. Così si percepisce la massa e la forma vetrosa, in profondità e sulla superficie leggermente ondulata del vetro liscio.

In questo modo il vetro, un materiale artificiale, assume le caratteristiche di un materiale naturale regolare, variegato, e discontinuo, omogeneo e mutevole. Ogni singolo elemento risulta unico e ricco di particolari da scoprire. Le possibili variazioni dell'intensità di luce scoprono o celano il materiale trasformando l'opera in spettacolo affascinante.

OperaLucis

Le Opere Venistile possiedono una valenza materica percepibile al tatto e all'osservazione ravvicinata, emergono le particolarità dei materiali e della lavorazione. Il design specifico, la geometria semplice e raffinata del disegno, permettono una vasta gamma di composizioni sulla superficie e rendono la realizzazione pienamente adattabile alla situazione specifica di installazione, assecondando le necessità formali del progetto complessivo. L'effetto scenico delle installazioni permette di inserire le Opere Venistile in ambienti di alto livello, con soluzioni formali di notevole ricchezza e di efficacia spaziale.

OperaLucis è una realizzazione Venistile interamente Made in Italy.
